## Iraq Project Terminal Umm Qasr, Iraq

Partnering progress

# When Local Potential Partners with World-Class Expertise

## GulfTainer in Iraq

Founded in 1976 to manage and operate two ports in the Emirate of Sharjah, GulfTainer is now the largest private independent container terminal operator in the world, with a strong global presence and business interests in East Europe, South America, the Middle East, and the Mediterranean.

We believe in the power of partnerships and have developed strong ties with global shipping lines that value high productivity and service flexibility. Best-in-class port operations wouldn't be complete without a world-class third-party logistics provider. And that's why we launched Momentum in 2008 to deliver cost-effective supply chain solutions from transportation and freight forwarding to warehousing and logistics cities. After more than 35 years, we have grown from strength to strength to become a globally competitive port operator and third party logistics provider.

GulfTainer's Iraq Project Terminal (IPT) facility opened for business in August 2010 at Umm Qasr Port, and has rapidly grown to make a name for itself. Today, the facility has developed into a fully operational terminal, backed by a full investment in assets, such as mobile harbour cranes, container-handling equipment, and paved, secure storage areas.

IPT is aimed entirely at general break-bulk, project cargo shipments and associated logistics. To date, the facility is already in full compliance with, and supports the requirements of Iraq's fast-developing Oil and Gas and Energy sectors.

In addition to our specialised terminals, cargo arriving at the IPT or the neighbouring Iraq Container Terminal (ICT) can be moved under bond to our Umm Qasr Logistics Centre (UQLC), a 750,000 sq m logistics city that is equipped with safe and secure open and covered areas, a 100,000 sq m paved yard, warehousing, and cold stores. Through our fully integrated logistics arm, Momentum, we can also provide comprehensive transport and logistics links to and from the port, effectively connecting Basra, Baghdad and beyond.

IPT is a specialised facility that is fully equipped to handle a large variety of general cargo, including bulk, pipes, transformers, and project cargo. The facility is guarded by its own security staff, is fenced, well-lit, and operational 24/7.

By bringing our decades of experience and taking a professional approach that utilises cutting edge technology and innovative procedures, we continue to ensure that our customers have a secure, cost-effective and trouble-free experience.
