CUSTOMER ADVISORY

GT LINES Implements Trade Continuity Surcharge - TCS on ISC → GULF trade
*as from **September 21st, 2026***

Supporting reliable and uninterrupted connectivity across the ISC–Gulf trade

Date: 14/09/2026
Ref: GTL1/26/110926

Dear Valued Customer,

As market conditions continue to evolve across the Indian Subcontinent–Gulf trade, GT LINES remains committed to providing dependable shipping solutions and maintaining consistent connectivity for our customers.

The current operating environment requires additional measures to ensure the stability of our services, including maintaining adequate vessel capacity, optimizing network deployment and safeguarding schedule reliability across the trade.

In support of these efforts, **GT LINES will implement the following surcharge:**

❖ **Trade Continuity Surcharge (TCS): USD 200 per TEU**

The surcharge will apply to **all import and export shipments to and from Gulf destinations** carried on the following GT LINES services:

- **Khorfakkan India Express** (KIX1, KIX2)
- **Khorfakkan Pakistan Express** (KPX1)

The **TCS will apply to dry, reefer and special containers**, effective **September 21st, 2026**, based on the vessel loading date.

This measure will support GT LINES in **maintaining reliable service coverage, preserving schedule integrity and ensuring continued connectivity** across the Indian Subcontinent–Gulf trade.

Customers requiring further assistance or clarification may contact us at: **gtlines@gulftainer.com**.

We thank you for your continued trust and partnership.

Regards,
GT LINES | Sharjah, UAE
